About The Seminar: Design thinking is a **process for creative problem solving**. Design thinking has a human-centered core. It encourages organizations to focus on the person they're creating for, which leads to better products, services, and internal processes.

Objective: The Seminar Design Thinking tackles complex problems by: **Empathizing:** Understanding the human needs involved. **Defining:** Re-framing and defining the problem in human-centric ways. **Ideating:** Creating many ideas in ideation sessions.

Outcome: Design thinking is a non-linear, iterative process that teams use to understand users, challenge assumptions, **redefine problems and create innovative solutions to prototype and test.** Involving five phases—Empathize, Define, Ideate, Prototype and Test—it is most useful to tackle problems that are ill-defined or unknown.

Inauguration: The Seminar started with seeking the Divine Blessings of Bhairavaikya Parama Poojya Jagadguru Padmabhushana Sri Sri Sri Dr. Balagangadharanatha Mahaswamiji and Parama Poojya Jagadguru Sri Sri Sri Dr. Nirmalanandanatha Mahaswamiji.
