

# S.J.C. Institute of Technology, Chickballapura

## Department of ECE

Date: 4.03.2022

### Report on Webinar

- A technical Webinar was conducted on topic "Implementation of Real Time Image Processing Algorithm using VHDL for ASIC Level" and the Resource person was Prof. Sayantam Sarkar from MVJ College of Engineering.
- Webinar was conducted for faculties and students from diverse fields.
- Webinar was conducted on 4.03.2022 at 2:00 to 3:45.
- Organizers were Chandini A.G, Ramalinge Gowda K.C and Dr Rangaswamy C.
- Webinar was Successfully conducted, and 38 members attended from diverse fields including students and faculties.
- A Proof of flyer is attached below.
- Feedback from many attendees were good and they want more webinars as this to conduct.
- E-certificates were given to all faculties those who have Attended.
- **Objective:** With the advent of mobile embedded multimedia devices that are required to perform a range of multimedia tasks, especially image processing tasks, the need to design efficient and high-performance image processing systems in a short time-to-market schedule needs to be addressed. Image Processing algorithms implemented in hardware have emerged as the most viable solution for improving the performance of image processing systems. The introduction of reconfigurable devices and system level hardware programming languages has further accelerated the design of image processing in hardware. Most of the system level hardware programming languages introduced and commonly used in the industry are highly hardware specific and requires intermediate to advance hardware knowledge to design and implement the system.
